

修改POD的默认IP网段

kubernetes版本: v1.10.0

[kubernetes安装教程](#)

安装kubernetes的时候修改以下配置文件

1、修改config.yaml配置文件

```
apiVersion: kubeadm.k8s.io/v1alpha1
kind: MasterConfiguration
api:
  advertiseAddress: 10.22.60.26
networking:
  podSubnet: 192.168.0.0/16 ## pod
apiServerCertSANS:
- 10.22.60.26
imageRepository: 10.22.60.25/kubernetes
kubernetesVersion: v1.10.0
```

2、修改flannel.yaml 网络配置

```
...
net-conf.json: |
  {
    "Network": "192.168.0.0/16", # config.yaml
    "Backend": {
      "Type": "vxlan"
    }
  }
...
```
